

Darrell Dreher and Vaughn McMurtrie were high school friends who eventually founded M&D Excavating.

When it comes to underground technology, M&D excel in their field.

TWENTY FIVE YEARS FOR M & D EXCAVATING

M & D of Hays, Inc. recently celebrated twenty-five years of service in Kansas. It was back in 1980 when Darrell Dreher and Vaughn McMurtrie, high-school friends, joined forces and developed M & D, Inc.

Initially their business entailed construction and lawn sprinkler system installation, but as they worked in these fields they realized a need in Hays for a full-service excavation company. They began small and have since grown to where they now have twenty employees and cover the entire state of Kansas with their bore and trenching crews. And they meet the needs of local contractors with backhoe and loader services.

On hand for the open-house festivities was Donnie Wild, world renowned JCB Corporate Demonstrator, and as usual, Donnie put on a show that was appropriate for his last name.

When JCB Demonstrator Donnie Wild gets on a JCB Backhoe, things get a little wild.

This wasn't the Wild man's first trip to M&D in Hays. He was there in 1980 when M&D bought their first JCB backhoe. Today M&D has a fleet of nine JCB Backhoes and a new JCB Wheel Loader.

This was not the first time Donnie visited Hays and M & D Excavating. It was back in 1980 when Donnie demonstrated a new JCB backhoe to a then brand new company. M & D purchased a new JCB backhoe at that time and they have been with JCB ever since. Today they have a fleet of nine JCB backhoes and also a new JCB wheel loader.
